

Introducing, VapourTech® RWC Roof Wall Commercial & New Innovations Accessories

VapourTech® RWC Roof Wall Commercial

- Class 4 Vapour Permeable
- Weather Barrier, advanced water, air and vapour control membrane
- Four-layer construction for high strength, tear, puncture and UV resistance
- Low Flammability, suitable for all BALs in bushfire-prone areas in Australia
- Helps reduce energy consumption and increase occupant health and comfort.

Cavity Drainage Battens - 10 mm

- R_t 0.15 in-situ to reduce heat transfer

ThermalCav™ Drainage Battens - 20 mm

- R_t 0.26 in-situ thermal break for steel-frame construction
- Heat, fire, and UV resistant
- Self-adhesive backing for fast, easy installation
- Creates a natural drainage plane for moisture to escape
- Enhances the energy efficiency and breathability of the system
- Termite, mould, and mildew resistant
